

2018 - 2025
Brazil

2018 - 2025
Brazil

Dear Leaders of the Medical Section of the Goetheanum,

Allow a brief presentation of the **AOA - Association of Anthroposophical Dentistry**, which completed 6 years of activity (in BRAZIL) in September 2024.

Created in **2018**, as a non-profit association that aims to promote the study, research, dissemination and strengthening of Anthroposophical Dentistry along with other Anthroposophy initiatives (in Brazil and the world) encouraging the dental surgeon in the search for a broader view of the Human Being, strengthening himself as PICS-Integrative and Complementary Health Practice (as foreseen by the Brazilian government).

Every moment of this extraordinary journey, every step taken towards progress is the result of work, integrity, respect and commitment to our peers and partners and has been celebrated with enthusiasm and pride.

The history of the A.O.A. began considering the expanded and integral vision of Anthroposophy in human development and the need to integrate dentists with other areas of health, seeking the coherence of the multi and interdisciplinary look at the patient.

Therefore, the **2-year course in anthroposophical dentistry** was born with other health professionals based in the capital of the State of São Paulo and with a workload of 438 hours.

AOA - ASSOCIATION OF ANTHROPOSOPHICAL DENTISTRY

contato@aoantroposofica.com.br

[@a.o.antroposofica](https://www.instagram.com/a.o.antroposofica)

www.aoantroposofica.com.br

During these years much has been accomplished by AOA:

- **Study group** active since the foundation of the AOA where 4 books have already been studied and always bringing guests to enhance the meeting and exchanges;
 - **5 Symposia** were held, three of which were international, reaching 13 countries present; On **July 5th of this year**, we will have our **6th edition**.
 - **Anthroposophical Dentistry Course** in partnership with ABMA-SP is in the fifth class and will start the next class in March 2026;
 - **Continuing Education** (semester) - for former student dentists who seek deepening;
 - **Face-to-face lectures throughout Brazil**;
 - **Scientific Articles**: presentation of clinical cases at the 1st International Symposium on Integrative Pediatrics.
 - **XIV BRAZILIAN CONGRESS of ANTHROPOSOPHICAL MEDICINE** - participation with a dentistry workshop from October 13 to 15, 2022;
 - **XV BRAZILIAN CONGRESS of ANTHROPOSOPHICAL MEDICINE** - participation in the clinical case discussion group from October 18 to 20, 2024.
 - **Social Outpatient Clinic of the Monte Azul Community Association**, a partnership was signed where AOA student dentists will be part of the existing projects, bringing information and education about dentistry, promoting lectures, conversation circles and monitoring patients in a multidisciplinary way.
 - **Introductory discipline to Anthroposophy in the Health Area as a modality in the USP – University of São Paulo** update program with classes taught by AOA within the university and aimed at undergraduate and graduate students in Dentistry, dental surgeons and other professionals in the health area.
- 

The A.O.A. is a **non-profit institution** with the mission of promoting and disseminating the studies of Anthroposophical Dentistry to all who approach it in freedom.

In its history, the AOA is reaping good fruits and sowing new and precious seeds, being **supported and recognized** by the **Medical Section of Brazil**, where **we represent Anthroposophic Dentistry in Brazil**. All this work has been carried out with great commitment, responsibility and dedication.

Thus, observing everything that has been accomplished throughout the biography of the AOA and aiming for an even more prosperous future for our association, we come to ask that the **Medical Section of the Goetheanum** supported by the **Medical Section of Brazil** officially recognize the work of this institution that works in favor of Anthroposophy in Brazil without violating its precepts.

This recognition will open many doors to further expand the reach of the AOA with fellow dentists who often show insecurity for not having this important and noble seal of the **Medical Section of the Goetheanum**.

We will honor this recognition and continue to work with the same seriousness and responsibility as always.

Last but not least, we emphasize the fact that with 5 YEARS of proven activities, the request for recognition with the Federal Council of Dentistry of Brazil has already been delivered (in Dec 2023), once again demonstrating that AOA respects the steps and processes of the institutions with which it relates.

We appreciate your attention by making us available for further clarification and we are waiting for the response of the Medical Section.

Announcement by the **Faculty of Dentistry of the University of São Paulo - FOUSP.**

From the first semester of 2025, the Faculty of Dentistry of the University of São Paulo - FOUSP, in partnership with the AOA, will institute an unprecedented course in the Interdepartmental Disciplines sector of the Faculty of Dentistry.

The new interdisciplinary subject of Introduction to Anthroposophical Dentistry will be aimed at students who are in the last semester of their undergraduate degree in Dentistry, students on Strictu Senso or Latu Senso postgraduate courses in the health area, and dental surgeons and other health professionals.

The aim of the program is to introduce students to the fundamental concepts of anthroposophy applied to the dental field. Discussion of complementary therapeutic resources, in an interdisciplinary way, used in disease prevention and health recovery, with an emphasis on welcoming listening, contributing to the humanization of dentistry in the development of the therapeutic bond and the integration of the human being with the environment and society. This introductory course aims to introduce the basic concepts of anthroposophy in the area of health, as well as some possibilities for its application in daily practice, while respecting its scientific progress. However, broadening the vision of the conventional scientific method.

The AOA is a pioneer in offering this subject within a dental school. FOUSP is the first institution in Brazil to offer this subject within universities. A major milestone for the dissemination of anthroposophy and anthroposophical dentistry to the entire population of our country.

Study group

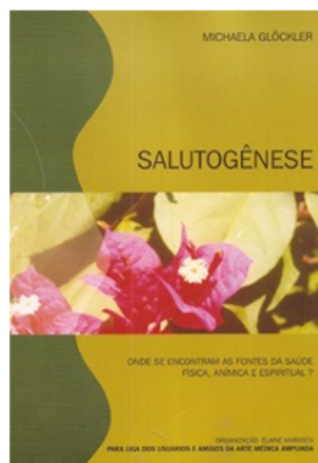

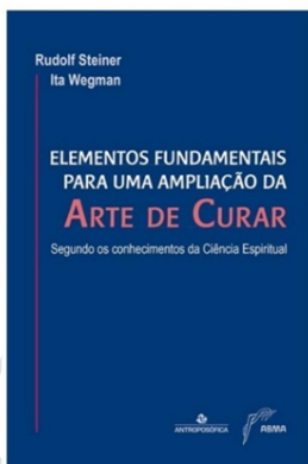

More than 50 meetings held so far.

Reading together anthroposophical books in the area of health, allowing the debate, resolve doubts and discussions. 3 books have been read and the 4th is in progress.

Group intended for beginner dental surgeons to arouse interest in expanding their studies, free and with free access.

These are monthly meetings that allow individual reading in advance to enrich the meeting with elucidation of doubts.

>>> *With the COVID-19 pandemic, meetings have become ONLINE until today.*
